

# Help Create Software That Powers Diplomacy: Application Development Group

Project Title	Help Create Software That Powers Diplomacy: Application Development Group
Project Summary	Develop a mobile web application, implementing user requirements for a simple web form and database using published UI and system architectural standards, to meet requirements over U.S. diplomatic missions overseas.
Country	Germany
Agency	Department of State
DoS Office	N/A
Post	FRANKFURT
Section	Other
Number of Interns	3

## Project Description

Selected applicants will develop software using C# .NET MVC on Azure to build a working prototype of cloud-ready software providing administrative support to U.S. diplomatic posts throughout Europe. Successful applicants will work with foreign affairs staff and local nationals in various countries, to create software meeting unique U.S. diplomatic requirements.
